Rapid Response Medical Insights Platform Features

Insight Collection Form

- **Customizable** - Collection tool field values can be customized for specific markets within the company.
- **Field Inter-Dependency** – the value selected in one field can control the values displayed in subsequent fields, reduces errant input.
- **Fast Modifications** - Field values can be changed at any time, with 24 hour turnaround, and at no additional cost
- **On-line/Off-line** – Tool can be used when no internet connection is available. Insights are transmitted automatically the next time an internet connection is available.
- **SSO Integrated** – Tool access can be thru your company's Single Sign-On (SSO/SAML) server.
- **Supporting Documents** – Images and documents can be uploaded as part of an Insight submission.
- **Multi-device/Browser** – Tool operates on all devices (laptop, tablet, phone) and in all major browsers (Chrome IE, Edge, Safari, Firefox)
- **Insight Templates** – Insight Templates allow frequently used sets of field choices to be saved and recalled to be used in creating subsequent insights.

Insight Analysis Portal

- **Cross-reference Indexing** – Equivalent terms, miss-spellings, synonyms, and abbreviations are cross-referenced such that filtering on one term will return insights containing all equivalent terms.
- **Insight Translation** – Foreign language Insights are translated into English and can be viewed in English or their native language.
- **Trend Analysis** – The cross-reference index is utilized to identify trends within insights. Word Cloud and Frequency graphs depict the frequency with which terms appear. Clicking a term on the graph displays all entries containing that term and equivalent terms.
- **Documents library** –The Documents library organizes supporting documents in folders corresponding to the submission form fields.
- **Export to Word** – Individual entries or parts of entries can be compiled and then exported to a MS Word document. The entries' indicative information is carried to the Word document as footnotes.
- **Export to Excel** – Export filtered entries to a native MS Excel file.
- **Insight Comments** – Portal users can start discussions around insights by adding their comments to an insight. Insight comments are shared with all contributors and the originator further enhancing the value and utilization of insights.
- **Real-time Reporting** – Submitted entries can be viewed in real-time in the analysis portal.
